**Policy Values**

The table shows policy values and benefits guaranteed at issue. Because the current crediting rate is equal to the Guaranteed Minimum Interest Rate and because current cost of insurance and administrative expense charges are also set at maximum rates permitted by the policy, median and current values and benefits are the same as the guaranteed values shown.

\*If, on the Maturity Date, the Insured is still living and this Policy is in force, the Maturity Date will automatically be extended until the Policy Anniversary when the Insured's Attained Age is 121.

**Return of Premium:**

Provided You have not taken any Policy Loan or partial withdrawals, if You surrender this Policy in full at any time, We will pay You an amount equal to at least the Single Premium Amount paid for this Policy, less any premium taxes. This benefit does not apply if You have taken a loan or partial withdrawal on the Policy.

### GENERIC ILLUSTRATIONS OF A TERMINAL ILLNESS ACCELERATED BENEFIT PAYMENT

Your policy will include an accelerated death benefit. This is a valuable benefit that will allow the owner to receive up to 50% of the base policy death benefit if we receive a satisfactory certification that the Insured's medical condition is expected to result in the Insured's death within 12 months. The owner can use the benefit to help cover mortgage or rent payments, help with medical treatment or to help pay any bill he or she sees fit. There is no additional premium charge for the accelerated death benefit; however, we will discount the benefit by the discount factor because it is an early payment of the death benefits and charge an administrative fee of \$150.

The illustration below is a sample illustration of the effect of a 50% acceleration on a Single Premium Universal Life policy with single premium of \$100,000 and the amount of insurance of \$250,186, issued to a 45 year old male non-smoker, with an acceleration at age 55. This illustration is based on the guaranteed factors, and an interest rate of 8%.

This illustration is hypothetical only and is not specific to your policy. At the time you make a claim to accelerate death benefits, you will receive a disclosure statement showing the effect of an acceleration of benefits on your policy's values.
